

XGEN COATING SYSTEM™

Solutions. Delivered.

APPLICATION CASE STUDY:

Project Description: Apply Product to Brick Pavers at University
Customer: Indiana University Southeast
Location: New Albany, Indiana
Date: August, 2016

PROJECT DETAILS

Project Overview: The University had indoor brick pavers that had been waxed for years. The Customer could not keep the brick pavers clean and wanted to reduce the constant maintenance involved in stripping and waxing them. The customer also desired a gloss coating on the brick pavers for appearance.

xGen Product Purchased Through: PPG Louisville

Customer Contact: Daryl Parker

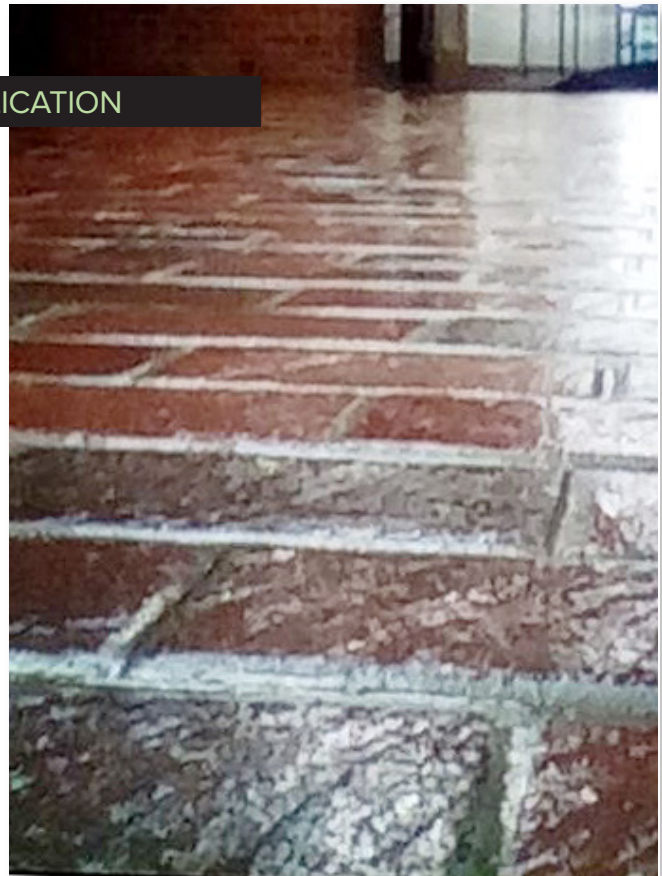

PRODUCT DETAILS

xGen Product Utilized: X-PROTECT Performance Topcoat - High Gloss

Features & Benefits: The brick pavers were stripped and coated with X-PROTECT. The bricks were located indoors and weren't porous due to wax residue so the high-gloss coating worked well. And it delivered the sheen requested by the Customer. Ongoing maintenance from stripping and waxing has been reduced and the brick pavers are much easier to clean with non-harsh chemical cleaners. The xGen coating application provides chemical resistance and provides a long-term solution that will last 3-5 years and will provide slip resistance on the floors.
